

UTILIX

Windows Utilities

Privacy Policy & Terms and Conditions

Developed and distributed under the developer name

Navonmesh Developers

Last Updated: October 3, 2026

Important Acceptance Notice

By installing, opening, accessing, or using Utilix: Windows Utilities (“Utilix”, “the Application”, or “the App”), you acknowledge that you have read, understood, and agree to this Privacy Policy and these Terms and Conditions, to the extent permitted by applicable law.

If you do not agree with any part of these documents, you must not use Utilix. If you have already installed the Application and do not agree, you should stop using it and uninstall it.

Utility Availability

Free utilities:

- Clipboard Manager
- Quick Notes
- Screenshot Tool
- Color Picker
- Screen Ruler
- QR Code Generator

Paid utilities:

- OCR
- Image Compressor
- File Encrypter
- Password Generator

All premium purchases are handled through the Microsoft Store. Premium access is a one-time lifetime purchase, subject to applicable Microsoft Store terms, continued availability of the relevant product/functionality, and applicable law.

1. Privacy Policy

Last Updated: October 3, 2026

1.1 Developer and Privacy Commitment

Utilix is developed and distributed under the developer name “Navonmesh Developers” (“we”, “us”, or “our”). Utilix is designed as a 100% offline Windows application. It does not operate a cloud service for storing or processing your application data and does not intentionally send your user data to Navonmesh Developers or an external cloud/server. Core utility processing occurs locally on your Windows device.

1.2 Free and Paid Utilities

Free: Clipboard Manager, Quick Notes, Screenshot Tool, Color Picker, Screen Ruler, and QR Code Generator. Paid: OCR, Image Compressor, File Encrypter, and Password Generator. All paid functionality is purchased through Microsoft Store as a one-time lifetime premium purchase.

1.3 Clipboard Manager

Clipboard Manager can monitor the Windows clipboard and store text and image clipboard entries locally. Clipboard contents can contain sensitive information. Clipboard history is not intentionally transmitted to an external server by Utilix.

1.4 Quick Notes

Quick Notes stores note titles, content, and related timestamps locally in the application's SQLite database. Notes are not uploaded to Navonmesh Developers or an external cloud service.

1.5 Color Picker

Color Picker can sample screen pixels and stores recent/favorite color information and related metadata locally. It does not intentionally transmit color data to an external server.

1.6 Screenshot Tool

Screenshot Tool can capture the full screen, a window, a rectangle, or monitor/virtual-desktop areas. Screenshots, thumbnails, capture metadata, and paths may be stored locally. Screenshots can be copied to the clipboard or passed locally to OCR/QR functionality.

1.7 Screen Ruler

Screen Ruler may access screen pixels, cursor position, display metrics, and DPI information required for measurements. Ruler preferences such as mode, units, opacity, zoom, position, and always-on-top state are stored locally.

1.8 OCR

OCR can load images from files or clipboard, capture screen regions, and recognize text using Windows.Media.Ocr. OCR history may contain recognized text, source information, images, thumbnails, language information, and counts. History is saved only when enabled. OCR is paid.

1.9 Image Compressor

Image Compressor processes selected images or folders locally and can save compressed files locally. If compression history is enabled, local history may contain file names, source/output paths, sizes, dimensions, format, and timestamps. Image Compressor is paid.

1.10 QR Code Generator and Scanner

The QR utility generates QR codes from user-provided text and scans QR codes from images. Generated images can be copied or saved locally. If a decoded QR contains a URL and the user opens it, the user's default browser communicates with that external website. QR Code Generator is free.

1.11 Password Generator

Password Generator creates passwords and passphrases locally using cryptographically secure randomness. Generated passwords are not intentionally transmitted to Navonmesh Developers or an external cloud service. If copied to the Windows clipboard, a generated password may subsequently be captured by Clipboard Manager if clipboard history is enabled. Password Generator is paid.

1.12 File Encrypter

File Encrypter encrypts and decrypts files locally using password-based encryption. Selected files are not intentionally uploaded to Navonmesh Developers or an external cloud service. Encryption passwords are supplied by the user and are not transmitted to our servers. Users are responsible for securely retaining encryption passwords; forgotten passwords may make encrypted files unrecoverable. File Encrypter is paid.

1.13 Local Database and Storage

Utilix uses local SQLite storage and local application files. Depending on features and settings, local storage can contain clipboard text/image history, notes, colors, screenshot data and metadata, compression history, OCR history, settings, and logs. This information is not maintained as a cloud copy by Navonmesh Developers.

1.14 Local Logs

Utilix may create local startup, exception, error, and troubleshooting logs. These are stored on the Windows device and are not intentionally uploaded to Navonmesh Developers or an external server.

1.15 Information Not Intentionally Collected or Transmitted

Utilix does not intentionally transmit to its own servers: user names, email addresses, phone numbers, physical addresses, account credentials, clipboard history, notes, screenshots, OCR content, images/documents processed by the utilities, QR data, generated passwords, encryption passwords, files processed by File Encrypter, browsing history, precise location, advertising identifiers, behavioral analytics, or personal usage profiles.

1.16 Microsoft Store

Microsoft Store services may communicate with Microsoft's systems for installation, premium purchases, licensing, entitlement verification, and updates. Microsoft handles Store payment processing and related account services under Microsoft's own terms and privacy practices. Utilix does not directly collect or process payment-card or banking information.

1.17 External Websites

If a user chooses to open a URL obtained from a QR code, the user's browser communicates with the external website. Such websites are independent services with their own privacy policies and terms and are not controlled by Navonmesh Developers.

1.18 User Control

Users can manage or delete local histories and other stored data using available controls in Utilix. Users may also uninstall the Application. Windows and the installation environment may determine whether all local data is removed during uninstallation.

1.19 Security

Local processing reduces external exposure, but no software or computer system can be guaranteed completely secure. Local data security also depends on the user's Windows account, device security, permissions, backups, and other software.

1.20 Changes and Contact

This Privacy Policy may be updated when Utilix changes, new services/features are introduced, or legal requirements change. Developer: Navonmesh Developers.

Email: navonmeshdevelopers@gmail.com

2. Terms and Conditions

Last Updated: October 3, 2026

IMPORTANT ACCEPTANCE NOTICE

By installing, opening, accessing, or using Utilix: Windows Utilities (“Utilix”, “the App”, or “the Software”), you acknowledge that you have read, understood, and agreed to these Terms & Conditions and the accompanying Privacy Policy, to the extent permitted by applicable law. If you do not agree with these Terms & Conditions or the Privacy Policy, you must not use Utilix. If Utilix is already installed, you should stop using it and uninstall it.

2.1 Acceptance of Terms

These Terms & Conditions (“Terms”) govern your installation, access to, and use of Utilix: Windows Utilities, developed and made available by Navonmesh Developers (“Developer”, “we”, “us”, or “our”). By using Utilix, you agree to be bound by these Terms and the accompanying Privacy Policy. If you do not agree, do not install, access, or use the App.

These Terms apply to all versions and distributions of Utilix made available by the Developer, including versions distributed through the Microsoft Store, subject to any additional terms imposed by Microsoft or the applicable distribution platform.

2.2 App and Utility Classification

Utilix is a collection of Windows utilities. Availability may vary by version, platform, Store configuration, or future updates.

Free utilities include Clipboard Manager, Quick Notes, Screenshot Tool, Color Picker, Screen Ruler, and QR Code Generator/Scanner.

Premium utilities include OCR, Image Compressor, File Encrypter, and Password Generator.

Premium functionality is subject to successful purchase and entitlement verification. The Developer may change, add, remove, replace, or modify utilities or functionality in future versions, subject to applicable law and rights that cannot legally be excluded.

2.3 License to Use Utilix

Subject to these Terms, the Developer grants you a limited, non-exclusive, non-transferable, revocable license to install and use Utilix for lawful personal or otherwise permitted purposes on compatible Windows devices.

You may not copy, modify, reverse engineer, decompile, disassemble, redistribute, sublicense, sell, lease, or otherwise exploit Utilix except where such restriction is prohibited by applicable law or expressly permitted by the Developer.

2.4 Premium Purchase and Lifetime Access

Certain features of Utilix require a Premium purchase. Premium is offered as a one-time lifetime purchase through Microsoft Store, rather than as a recurring subscription, subject to applicable Microsoft Store terms, availability, and successful entitlement verification.

The Premium purchase grants access to the Premium functionality made available for the applicable Utilix version and does not represent a transfer of ownership of the Software or its intellectual property.

Microsoft Store is responsible for processing the actual purchase transaction. Store account, payment, billing, refund, tax, and transaction-related matters may also be subject to Microsoft's terms, policies, and systems.

2.5 Premium Activation and Recovery

IMPORTANT: Your Premium activation is securely stored on this device. If the Premium license file is deleted, corrupted, or modified, Utilix will temporarily show the Free version. You will not need to purchase Premium again. Simply click Get Premium again and Microsoft Store will recognize your existing purchase and restore your Premium access, provided Microsoft Store confirms that the applicable Premium purchase belongs to the current Store account.

Utilix maintains a protected local Premium entitlement record in the user's local application data. Despite the .dll file extension used for this entitlement container, it is not an actual executable DLL and is never loaded as application code. It is used only as a protected binary entitlement container.

The local entitlement contains protected information such as format/version information, product or add-on identifiers, activation information, and integrity-related information. Windows Data Protection API (DPAPI) is used to protect the relevant data.

On normal startup, a valid local entitlement may enable Premium immediately without requiring a full Microsoft Store entitlement check on every launch.

If the entitlement is missing, corrupted, modified, invalid, undecryptable, or otherwise fails validation, Utilix may safely start in Free mode. This condition does not by itself mean that a Microsoft Store purchase has been cancelled, refunded, or lost.

2.6 First-Time Premium Purchase

When a user purchases Premium, Utilix opens the native Microsoft Store purchase dialog. The purchase is completed through Microsoft Store.

After purchase completion, Utilix verifies the Premium add-on using the exact Microsoft Store offer token "premium_utilix". Only after the applicable Premium entitlement is confirmed does Utilix create or update the local protected Premium entitlement.

After successful verification, Premium is enabled immediately. The local entitlement exists primarily to avoid dependence on Store entitlement detection during every normal startup.

2.7 Already Purchased / Premium Recovery

If the user already owns Premium but the local entitlement is missing or corrupted, Utilix starts in Free mode and the user may select Get Premium.

Microsoft Store may return an AlreadyPurchased result. Utilix does not treat AlreadyPurchased alone as sufficient proof of entitlement.

Utilix verifies the current Store entitlement for the exact Premium add-on. If Premium ownership is confirmed, Utilix recreates the local protected entitlement and restores Premium immediately.

The user is not charged again for the same purchase during this recovery process. Recovery depends on Microsoft Store being able to recognize and verify the purchase for the current Store account.

2.8 Premium Entitlement and Tamper Protection

The local entitlement is not stored as a simple plaintext flag such as “Premium=true”. It uses a binary structure with versioning and integrity validation, together with DPAPI-protected, user-specific data. Simply editing or modifying the entitlement file should cause validation to fail and Utilix should return to Free mode.

A copied entitlement from another Windows user or machine is not expected to decrypt successfully because of DPAPI protection.

This is practical protection for normal users and is not represented as impossible-to-break DRM or a guarantee against determined reverse engineering or tampering.

2.9 No Store/Web Fallback

If the native Microsoft Store purchase dialog cannot be opened, Utilix must not open a browser, open a Microsoft Store webpage, launch ms-windows-store://, or redirect the user elsewhere.

The required purchase-dialog failure message is: “Window can't be opened. Please contact the developers”

2.10 User Content and Local Processing

Utilix is designed to process the content required by its utilities locally on your Windows device. Depending on the utility used, this may include clipboard contents, notes, screenshots, screen pixels, images, files, OCR input, generated passwords, QR data, and other content intentionally provided to the App.

You remain responsible for content you enter, capture, generate, encrypt, decrypt, process, save, or otherwise use with Utilix.

The Developer does not intentionally upload your utility content to a Developer-controlled cloud service as part of normal Utilix operation. Microsoft Store services are separate and may process information necessary for Store distribution, purchasing, licensing, updates, and related services.

2.11 File Encrypter Responsibilities

File Encrypter is intended to provide local file encryption and decryption functionality. You are solely responsible for choosing, remembering, and protecting the password used for a file.

If you lose or forget an encryption password, recovery of encrypted content may not be possible. The Developer does not guarantee password recovery, decryption, or restoration of encrypted files.

You should maintain appropriate backups of important original and encrypted files and verify operations before deleting or replacing an original file.

You must not use File Encrypter for unlawful activity or to conceal unlawful content or conduct.

2.12 Password Generator Responsibilities

Password Generator creates passwords or passphrases locally based on the options selected by the user.

You are responsible for deciding where and how generated passwords are used and stored. The Developer does not guarantee that a generated password will be accepted by every website, service, application, or organization.

If Clipboard Manager is enabled, a password copied to the Windows clipboard may be captured by Clipboard Manager according to its configured history behavior.

2.13 Clipboard, Sensitive Information, and Privacy

Clipboard Manager can store clipboard data locally, which may include passwords, authentication codes, personal information, documents, images, or other sensitive material depending on what you copy.

You are responsible for reviewing and managing clipboard history and deciding whether sensitive information should be stored in the App.

For information about local storage, processing, security practices, Microsoft Store services, and user controls, refer to the Utilix Privacy Policy.

2.14 Screenshots, OCR, Images, and QR Features

Screenshot Tool may capture the screen, a selected region, a window, a monitor, or a virtual desktop depending on the selected mode.

OCR may process text from supported local images, clipboard content, or screen regions. OCR results may be stored locally as part of App history where applicable.

Image Compressor processes images locally and may maintain local history or metadata associated with compression operations.

QR Code Generator/Scanner may generate QR codes and decode QR information from supported images. If decoded information is a URL and you choose to open it, the URL may be opened in your browser and the destination website will be governed by its own terms and privacy practices.

You are responsible for ensuring that you have the necessary rights and permissions to capture, process, compress, scan, or otherwise use content with these utilities.

2.15 Accuracy, Backups, and Data Loss

Utilix is provided as a collection of general-purpose utilities. Results may depend on input, Windows configuration, device, display characteristics, file format, language, operating system components, and other technical factors.

You are responsible for maintaining backups of important files, notes, screenshots, images, encrypted files, and other data. The Developer does not guarantee that locally stored data, history, settings, or generated output will always be preserved.

Before destructive or irreversible operations, including encryption, file replacement, deletion, or conversion, you should maintain an appropriate backup.

2.16 Prohibited Use

You agree not to use Utilix in violation of applicable law or regulation, or in a manner that infringes the rights of others.

2.17 Updates and Availability

The Developer may release updates, bug fixes, security improvements, feature changes, or other modifications to Utilix. An update may alter, add, remove, or modify functionality.

The Developer does not guarantee that every utility or feature will remain available indefinitely, or that Utilix will remain compatible with every future Windows version, hardware configuration, or third-party service.

Premium functionality is subject to the availability of the applicable Microsoft Store product and supporting Store services.

2.18 Third-Party Components and Microsoft Store

Utilix may rely on Windows operating system components, libraries, frameworks, Microsoft Store services, and other third-party components. Such components may be subject to their own licenses, terms, or privacy practices.

Microsoft Store is operated by Microsoft. Microsoft controls its own Store infrastructure, account services, payment processing, licensing systems, refund processes, and related services. Your use of Microsoft Store is also subject to Microsoft's applicable terms and policies.

2.19 Disclaimer

To the maximum extent permitted by applicable law, Utilix is provided on an “as is” and “as available” basis. The Developer makes no guarantee that the App will always be uninterrupted, error-free, completely secure, or suitable for every particular purpose.

Nothing in these Terms is intended to exclude or limit any consumer or statutory rights that cannot lawfully be excluded or limited.

2.20 Limitation of Liability

To the maximum extent permitted by applicable law, the Developer shall not be liable for indirect, incidental, special, consequential, or similar losses arising from or related to the use of Utilix, including loss of data, files, passwords, encryption keys, business opportunity, or other information, except to the extent such liability cannot legally be excluded.

Nothing in these Terms limits liability where applicable law does not permit such limitation.

2.21 Data Loss and Recovery

You acknowledge that locally stored data can be affected by device failure, operating system changes, application updates, user actions, disk problems, malware, accidental deletion, or other circumstances.

The Developer does not guarantee recovery of deleted or corrupted local data, including clipboard history, notes, screenshots, OCR history, compression history, generated data, or encrypted files.

The Premium recovery process described in these Terms is specifically for recovering verified Premium access and is not a general data-recovery service for other Utilix data.

2.22 Termination

You may stop using Utilix at any time by uninstalling it and ceasing use of the App.

The Developer may discontinue or modify Utilix or its features subject to applicable law and obligations associated with purchases or consumer rights. Termination or discontinuation does not waive rights or obligations that by their nature should survive termination.

2.23 Changes to These Terms

The Developer may update these Terms from time to time to reflect changes to Utilix, its features, legal requirements, security practices, or other operational matters.

The updated version will include a revised “Last Updated” date. Your continued use of Utilix after an updated version becomes applicable constitutes acceptance of the updated Terms to the extent permitted by applicable law.

2.24 Governing Law

These Terms are intended to be governed by the laws of India, subject to mandatory consumer-protection or other rights that cannot legally be excluded. Courts having appropriate jurisdiction in India may have jurisdiction over matters arising from these Terms, subject to applicable law.

2.25 Severability and Entire Agreement

If any provision of these Terms is determined to be invalid, unlawful, or unenforceable, that provision will be enforced to the maximum extent permitted by law, and the remaining provisions will continue in effect.

These Terms, together with the Utilix Privacy Policy and applicable Microsoft Store terms or third-party licenses, constitute the terms governing your use of Utilix, except where additional mandatory terms apply.

2.26 Contact

For questions, support requests, Premium recovery issues, or other inquiries concerning Utilix, please use the official contact information provided by Navonmesh Developers in the App, Microsoft Store listing, or official website.

Prohibited Use — Specific Restrictions

- Use the App to facilitate unlawful activity.
- Attempt to bypass Premium entitlement or Microsoft Store purchase mechanisms.
- Tamper with, manipulate, forge, or fraudulently reproduce entitlement information.
- Distribute modified or unauthorized copies of Utilix.
- Use the App to intentionally damage, interfere with, or compromise another person's device, files, accounts, or data.
- Use the App in a way that violates applicable Microsoft Store or Microsoft account terms.

This is a product-specific legal draft and is not a substitute for advice from a qualified lawyer.
