Windows Utilities

Privacy Policy & Terms and Conditions

Developed and distributed under the developer name

Navonmesh Developers

Last Updated: August 25, 2026

1. Privacy Policy

Last Updated: August 25, 2026

1.1 Developer and Privacy Approach

Utilix: Windows Utilities (“Utilix”, “the Application”, or “the App”) is developed and distributed under the developer name “Navonmesh Developers” (“we”, “us”, or “our”).

Utilix is designed as a 100% offline Windows application. User data is processed locally and is not sent to Navonmesh Developers or an external cloud/server. This includes clipboard contents, notes, screenshots, OCR content, QR data, generated passwords, and files processed by the File Encrypter.

1.2 Utilities and Pricing

Free utilities: Clipboard Manager, Quick Notes, Screenshot Tool, Color Picker, Screen Ruler, and QR Code Generator.

Paid utilities: OCR, Image Compressor, File Encrypter, and Password Generator.

All purchases are handled through the Microsoft Store. Paid utilities are offered as a one-time lifetime purchase. Utilix does not directly collect or process payment-card or banking information.

1.3 Clipboard Manager

The Clipboard Manager may read Windows clipboard text and store clipboard history locally. Clipboard contents can contain sensitive information. Utilix does not transmit clipboard history to an external server.

1.4 Quick Notes

Quick Notes stores user-created notes locally on the Windows device. Notes are not uploaded to Navonmesh Developers or an external cloud service.

1.5 Screenshot Tool, Color Picker and Screen Ruler

The Screenshot Tool may capture screen content when used. The Color Picker may access screen pixels for color sampling. The Screen Ruler may access screen/display information needed for measurement. Related data is processed locally.

1.6 OCR

OCR may process images, clipboard images, or selected screen regions using Windows OCR functionality. Recognized text and OCR history, where enabled, are stored locally. OCR is a paid utility.

1.7 Image Compressor

The Image Compressor processes images selected by the user locally on the Windows device. Images are not uploaded to an external cloud service by Utilix. Image Compressor is a paid utility.

1.8 QR Code Generator

The QR Code Generator processes user-provided text or data locally to create QR codes. If a QR-related feature opens a URL, the subsequent communication is handled by the user's browser and the external website, not by Utilix.

1.9 Password Generator

The Password Generator creates passwords and passphrases locally on the device. Generated passwords are not transmitted to Navonmesh Developers or an external cloud service. The user is responsible for securely storing and protecting generated passwords. Password Generator is a paid utility.

1.10 File Encrypter

The File Encrypter encrypts and decrypts files locally on the user's device. Files selected for processing are not uploaded to Navonmesh Developers or an external cloud service. Encryption passwords are managed by the user. Navonmesh Developers cannot guarantee recovery of an encrypted file if its required password is lost or forgotten. File Encrypter is a paid utility.

1.11 Local Storage and Logs

Utilix may store clipboard history, notes, colors, OCR history, screenshot history, compression history, settings, and other feature data in local application files or databases. Utilix may also create local logs for troubleshooting. These are not intentionally uploaded to an external server.

1.12 Information Not Collected or Transmitted

Utilix does not intentionally transmit to its own servers:

- Clipboard contents
- Notes
- Screenshots
- OCR content
- Images or documents
- QR data
- Generated passwords
- Files processed by File Encrypter
- Browsing history
- Precise location
- Advertising identifiers
- Behavioral analytics
- Personal usage profiles

1.13 Microsoft Store Services

Microsoft Store services may be used for installation, purchases, licensing, updates, and related Store functionality. Microsoft handles Store payment processing and related Store account services under Microsoft's applicable terms and policies. Utilix does not directly receive your payment-card or banking information.

1.14 Data Security and User Control

Utilix keeps user data local to reduce external exposure. Users can manage or delete local histories and other stored data through the Application where supported, and can uninstall Utilix. The security of local data also depends on the security of the user's Windows device and account.

1.15 Changes

This Privacy Policy may be updated when Utilix changes, new utilities are introduced, pricing changes, or legal requirements change. The Last Updated date will be revised when changes are made.

1.17 Applicable Law

This Privacy Policy is intended to operate in accordance with applicable privacy and data-protection laws and regulations. Nothing in it is intended to remove rights that cannot legally be excluded.

2. Terms and Conditions

Last Updated: August 25, 2026

2.1 About Utilix

Utilix: Windows Utilities is developed and distributed under the developer name Navonmesh Developers. It contains free utilities—Clipboard Manager, Quick Notes, Screenshot Tool, Color Picker, Screen Ruler, and QR Code Generator—and paid utilities—OCR, Image Compressor, File Encrypter, and Password Generator.

2.2 License

Subject to these Terms and applicable Microsoft Store terms, Navonmesh Developers grants you a limited, non-exclusive, non-transferable license to use Utilix on compatible devices for lawful purposes. Ownership of the Application and its intellectual property is not transferred to you.

2.3 Premium Purchase

The paid utilities are provided through a one-time lifetime purchase. All purchase transactions are handled through the Microsoft Store. Payment, billing, refunds, Store accounts, and related transaction services are governed by Microsoft's applicable policies. “Lifetime” refers to the lifetime of the applicable purchased product/functionality and is not a guarantee that the Application or a feature will remain available forever.

2.4 User Content

You retain ownership of content you process using Utilix. You are responsible for having the necessary rights and permissions to process that content. Utilix is designed to process user content locally.

2.5 File Encrypter

You are responsible for selecting files, protecting encryption passwords, and keeping backups. If an encryption password is lost or forgotten, Navonmesh Developers cannot guarantee recovery of the encrypted file.

2.6 Password Generator

You are responsible for securely storing, using, and protecting generated passwords. Navonmesh Developers is not responsible for unauthorized access resulting from disclosure, loss, or misuse of generated passwords.

2.7 Clipboard and Sensitive Data

Clipboard contents can include passwords, authentication codes, financial information, or other sensitive material. You are responsible for managing and deleting clipboard history when appropriate.

2.8 Screenshots, OCR, Images and QR Data

You are responsible for ensuring that you have permission to capture, copy, scan, process, compress, or otherwise use content processed through Utilix. External websites opened from QR codes are independent services and are not controlled by Navonmesh Developers.

2.9 Prohibited Use

You may not use Utilix for unlawful activities, to violate privacy or intellectual-property rights, to process content without authorization, to distribute malware, to interfere with software or device security, or to circumvent licensing or technical protections.

2.10 Accuracy and Backups

OCR, compression, QR decoding, color sampling, screen measurement, encryption, and password-generation results may not always meet every requirement. Verify important results and maintain independent backups of important files and information.

2.11 Updates and Availability

We may update, modify, improve, suspend, or discontinue features. Updates may change functionality, compatibility, pricing, or local storage behavior.

2.12 Disclaimer

To the maximum extent permitted by law, Utilix is provided on an “as is” and “as available” basis. We do not guarantee uninterrupted operation, complete error-free operation, compatibility with every Windows configuration, perfect results, preservation of local data, or compatibility with every future Windows version.

2.13 Limitation of Liability

To the maximum extent permitted by law, Navonmesh Developers will not be liable for indirect, incidental, special, consequential, or punitive damages arising from use of or inability to use Utilix, including loss of data, files, passwords, encrypted files, revenue, productivity, or locally stored history. Nothing excludes liability that cannot legally be excluded.

2.14 Microsoft Store

If you obtain Utilix through the Microsoft Store, Microsoft Store terms and policies also apply. Microsoft is an independent platform provider and is not the developer of Utilix. Purchase, refund, billing, licensing, entitlement, and Store-account matters may be governed by Microsoft's policies.

2.15 Privacy

Use of Utilix is also subject to the Privacy Policy included in this document.

2.16 Governing Law

These Terms shall be interpreted in accordance with applicable laws of India, without prejudice to mandatory rights applicable in your jurisdiction. Disputes shall be subject to courts having appropriate jurisdiction, subject to applicable law.

2.17 Changes and Severability

We may update these Terms from time to time. If any provision is found invalid or unenforceable, the remaining provisions will continue to apply to the extent permitted by law.
